

## Allow us to get a little techie!

|tech•ie| \te-kē\

The **Mineraluxe Hot Tub Care System** works off the concept of Fusion Science. Focused on prevention, the unique fusion of the all-natural mineral technologies in **Mineraluxe Cube** will control and remove scale better than any other system. Using its unique anionic properties, **Mineraluxe** is able to work its way into existing scale formations, lifting them from surfaces where they are then filtered out (remove). Next, the mineral composition works to prevent new deposits from forming (repel). The net result of this “remove and repel” technological wonder is a cleaner hot tub environment that is easier to maintain and enjoy.

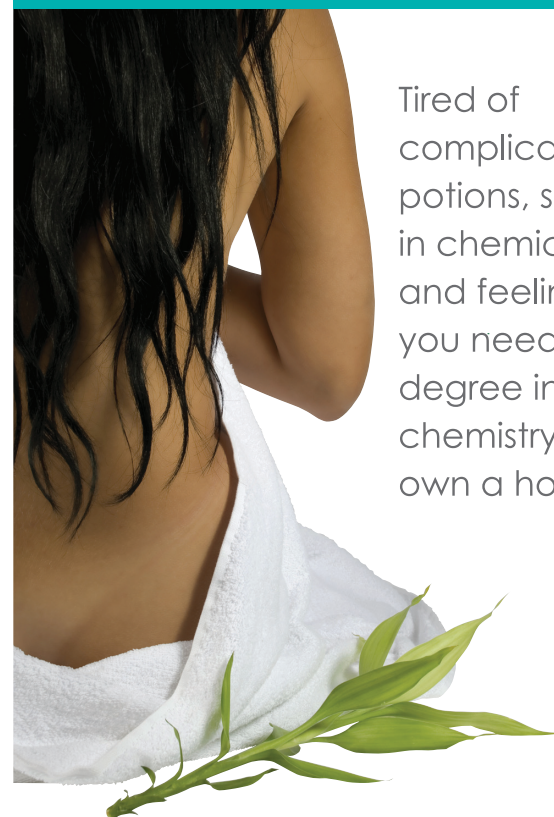

## You'll love the cool micro-bubble enhancement effect!

One of the coolest aspects of the **Mineraluxe** system is the effect the mineral composition has on water. Depending on the strength of the pump and the concentration of air being injected for hydrotherapy, this can activate the ability of your **Mineraluxe** system to improve the hydrotherapy experience through “micro-bubble enhancement”. The dramatic reduction in the size of the air bubbles creates a more intense experience and causes them to reside longer in the hot tub water. Once the pumps are turned off, the micro bubbles percolate back out of the water, restoring its crystal clear appearance. This is one of the unique advantages of the **Mineraluxe** system, and its mega pampering effect!

## Is Mineraluxe Worth the Price?

Without a doubt. Your hot tub is meant to be a special indulgence for you and your family. The **Mineraluxe Hot Tub Care System** allows you to pamper yourself and maximize your ‘tubbing’ experience. Nothing could be easier to use and it delivers incredible water clarity and comfort. The absence of problems and costly fixes really takes the stress and added cost out of ownership and maximizes the experience. And best of all, the **Mineraluxe** system and its unique benefits are available for a typical hot tub owner for less than the cost of a cup of coffee!

# Hot tub care has never been easier.

Tired of complicated potions, soaking in chemical soup and feeling like you need a degree in chemistry just to own a hot tub?

## Introducing Mineraluxe Hot Tub Care.

# Hot Tub Care Has Never Been Easier.

## Introducing Mineraluxe...

### Luxurious:

- Gentle on skin.
- Built-in moisturizers make it feel like a velvet glove is being wrapped around your body.
- Significantly reduces the harsh, dry effects of soaking in a hot tub.
- Like a mineral bath after a spring rain.

### Healthier:

- Replaces the need for many traditional hot tub care products (stain and scale products, enzymes cleaners, water conditioning agents, clarifiers).

### Simpler:

- Once a week, just add one cube + one pouch + maintain the pH and chlorine or bromine level.
- Degree in chemistry not required!

## The Mineraluxe Cube - The Heart of the Mineraluxe System

### The Mineraluxe Cube:

The cube is at the heart of the **Mineraluxe System**. It's a unique fusion of natural minerals and salts. The cube features "cleanse and repel" technology which loosens scale and mineral deposits from hot tub surfaces and prevents them from reattaching.

## What is the Mineraluxe System?

The **Mineraluxe System** is a simple weekly treatment of one **Mineraluxe CUBE**, advanced fusion of proprietary minerals, one pouch of **Mineraluxe OXYGEN** to deep cleanse bather wastes, providing unparalleled water clarity, and your choice of sanitizer. Sanitizers include Brominating Granules or Tablets, Chlorinating Granules or Tablets. The **Mineraluxe Suite** of accessory products includes **Mineraluxe Cleanse & Drain** and **Filter Revive**.

## How Does the Mineraluxe System Work?

Each **Mineraluxe Kit** comes with detailed instructions of how to use **Mineraluxe** for the first time and how to maintain your hot tub on the system, but here's a quick snapshot of the system:

One **Mineraluxe Cube** + One Pouch of **Oxygen** + Maintain pH and Sanitizer Level = Hot tub care has never been easier.

## Step 1: Mineraluxe Cube

- Following each fresh fill or when converting to Mineraluxe for the first time:  
Apply 2 **Mineraluxe Cubes** per 2,000 litres of hot tub water.
- On a weekly maintenance basis thereafter:  
Apply 1 **Mineraluxe Cube** per 2,000 litres of hot tub water.

## Step 2: Mineraluxe Oxygen

(Use as per label directions)

- Immediately after the addition of the Mineraluxe Cube:  
Apply 1 **Mineraluxe Oxygen** per 1,500 litres of hot tub water.

## Step 3: Mineraluxe Sanitizer

(Use as per label directions)

- Use your **Mineraluxe** sanitizer as per the label directions. Test your chlorine or bromine level with a reliable test kit and adjust to the level recommended on your sanitizer label.
